Subject Re: Fw: LWG Possible Interpretations of EPA's Potential
ARARs for Discussion - For September 25th ARARs Meeting

Chip,

There is another factually inaccurate statement in LWG's Possible Interpretations of EPA's Potential ARARs for Discussion text, this time in their acute direct toxicity criteria section. Acute aquatic life criteria are not just limited to being action specific ARAR's. They are applicable at all times, and at all locations in the Willamette River. Their applicability is not limited to times when construction is taking place.

Best regards,

Burt Shephard
